

**Project** Allianz Headquarters  
**Location** Munich, Germany  
**Use Case** Room Management  
**Product** one & free

The refurbishment of the Allianz company building in Munich was completed in 2020. As a part of the new office concept, iPads in combination with viveroo wall mounts are used on each floor, to control the office space.

Besides room control, viveroo wall mounts including an Apple iPad are used for signage as a booking system for the modern conference rooms. Continuous power and data connection are provided by a modern PoE network.
