

HUCK IT

Building Control System, Roßdorf

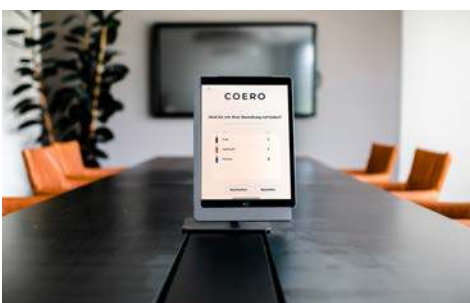

Project HUCK Headquarter
Location Roßdorf, Germany
Use Case Room Management & Check in
Products [one](#), [free](#) & [free flex](#)

The new headquarters of the software company HUCK IT has modern conference rooms for various events. Since 2019, the building is managed by an iPad based software, integrated with viveroo iPad mounts. Our wall mounts are the stylish solution for room signage and booking.

With Coero, HUCK IT developed a software solution that is used in the company building. In addition to room control, guests can register themselves with their smartphone. The specially adapted viveroo mount allows comfortable scanning using the iPad's camera.

Held in our table stand free flex, the iPad is used as a media display and to give presentations. Catering can also be ordered through the room management software.
