

VEGA Grieshaber

Exhibition Booth

VEGA

Project	VEGA Grieshaber KG
Location	Schiltach, Germany
Use Case	Exhibition Booth
Product	free flex

VEGA Grieshaber is one of the leading manufacturers for measurement technology and is operates globally. In 2020, the fair presentation was arranged to be visually supported by iPads. This allows visitors to learn about the products with an interactive software.

Our iPad stand free flex was customized to the conditions of the various machines and installed at the appropriate height. With the swivel joint, the right angle can constantly be adjusted for comfortable viewing of the iPad.

The mount is mounted directly to the exhibits and the iPad is secured against removal with the theft protection. The visitor always gets the appropriate information in an exciting and interactive way of presentation.
